

## AFTERWORD

### TITLE THAT FITS WITH THE THESIS THAT I AM ARGUING

Joe Blades

technology is our friend a belief  
and some live surrounded/immersed in  
the life offered/known dependent upon  
promise of a quality of life a betterment  
of comfort and security assumed  
progress carrot of dreams and beliefs  
in driven days endless change—  
education as much vocation as tool

technology surrounds like a spacesuit  
and it supports this compartment  
the walled and heated space with  
promise of more than shelter  
of reason for golden  
progress itself—re-enactment of boy  
In a bubble/boy who cried wolf—  
education not to blame

technology strives  
and it is sometimes unsettling:  
the curriculum and courses contradict  
promise of learning interests  
of being taught to manage replacement  
progress machines just doing  
in/stead of art in the heart  
education learning the “i” in time

technology made me do it another saying  
and sometimes things go very wrong with  
the assumptions of progress and the  
promise of a better life a better tomorrow  
of education as desirable want rather than  
progress for progress' sake a necessary  
in pseudo- or real competition—  
education's ongoing animal testing

technology / techno / technography / industry / technocracy  
 and / but / or / with / without  
 the / a / any / no / some  
 promise / premise / compromise / profession / agenda  
 of / in / on / for / against  
 progress / regress / congress / suppress / digress  
 in / on / out and about / of / towards  
 education / miseducation / re-education / uneducation / non-education

technology on the factory floor runs  
 and runs lags with constrained budgets as  
 the mediaeval institution trudges towards  
 promise of rest and reward in the shade  
 of that grove of trees the oasis of  
 progress beset by highwaymen and bagmen  
 in pursuit of the glint of pecuniary gain—  
 education the misunderstood pack animal

technology is pen paper manual typewriter  
 and binary computers to air/err control  
 the education journey ... adult learner  
 promise to create some contribution  
 of self something creative to construct  
 progress as if to continually \_\_\_\_\_  
 in education as if change = progress  
 education needs its shape-shifting

Joe Blades is a MEd (Adult Education) candidate at the University of New Brunswick,  
 Fredericton, and the author of seven poetry books. Email: [joe.blades@unb.ca](mailto:joe.blades@unb.ca).
