a **GTC** publication

KONGSBERG

EA 400 - Survey

www.kongsberg-simrad.com

EA 400 - Survey

**A complete survey system -
a combined hydrographic echo
sounder and a survey computer**

*Operator station with
LCD screen*

*Actual transducer installation
with a 38/200 kHz and a side-
looking sonar transducer*

Echo sounder:

- Wide choice of frequencies
- Reliable transducers
- Hull mounted sidescan sonar(optional)
- Portable mounting kits available
- Interfaces to all necessary sensors

Survey computer:

- Survey planning and monitoring
- Electronic background map
- Terrain modelling
- 3D view
- Contouring

Through water communication. Created by nature, developed by Nautronix.

NASNet™

A true multi user positioning system.

NAS-HAIL

30km underwater data telemetry system.

NASPos

Highly accurate USBL positioning system.

NASBOP

A proven telemetry system for surface BOP drilling.

“GLOBAL LEADERS IN THROUGH WATER COMMUNICATION AND POSITIONING TECHNOLOGY.”

Inspired by intelligent through water communication and positioning created by nature, Nautronix has perfected the art with the development of Acoustic Digital Spread Spectrum (ADS²) signalling.

This unique technology greatly enhances any oil exploration & production, or defence activity, that demands accurate acoustic communication and positioning. With ADS², data can be transmitted further, deeper and more accurately due to increased noise immunity and reduced interference - and for the very first time enables communication through water over distances of 30 kilometres or more.

This revolutionary signalling technique can also save millions of dollars for the Oil and Gas industry especially in the deep water environment.

Nautronix' strengths lie in its ability to integrate ADS² with well-proven applications and specialist expertise - in any location throughout the world! ADS² is the foundation for all Nautronix Acoustic Subsea (NAS) products including NASNet™, NAS-HAIL, NASPos, NASDrill, NASBOP and many more.

To realise the potential ADS² holds for your offshore or defence operations visit www.nautronix.com, see us on stand number 1216 at Offshore Europe 2003 or call us today

 Editorial Manager :Nynke van den Berg
 Account Manager :Victor van Essen
 Circulation Manager :Jeroen Zaagemans

Instructions for Contributors

The International Hydrographic Review is an international journal published three times a year by GITC bv. It is sponsored by the International Hydrographic Organisation. It contains original papers concerning all aspects of hydrography and associated subjects. All articles are subjected to peer review and are expected to be 4,000 to 6,000 words long, although longer articles may be considered. It also provides a medium for discussions in the form of shorter Notes, that are typically 1,500 to 2,000 words in length.

Information on the layout of articles and the form of illustrations and references may be obtained by requesting 'Instructions to Authors' from the Editor. They are also published in the first issue of each year. Submissions should be sent to:

Mr. Adam Kerr	or	Nynke van den Berg
Flagstaff Cottage		GITC bv
Lamorna		P.O. Box 112
Penzance		8530 AC Lemmer
Cornwall TR19 6XQ		THE NETHERLANDS
UNITED KINGDOM		Tel.: +31 (514) 56 18 54
Tel.: +44 (0)1736 - 731 228		Fax: +31 (514) 56 38 98
Fax.: +44 (0)1736 - 731 976		E-mail: nynke.vandenberg@gitc.nl
E-mail: Adam.J.Kerr@btopenworld.com		

Information on the Layout of Articles and the form of illustrations and references may be obtained by requesting 'Instructions for Authors'. These are published in the first issue of each year and may be obtained by contacting the Editor.

Reprints

Reprints of all articles (including articles published in earlier issues) can be ordered. For more information, please contact Nynke van den Berg at GITC.

Copyright

Any permission needed to incorporate material published elsewhere is the responsibility of the authors and it will be assumed that such permission has been maintained. The publisher is not responsible for statements made in the articles or advertisements nor is responsible for typing or converting errors.

No material may be reproduced in whole or in part without written permission of GITC bv.

Subscription Information

The Journal is published three times a year by GITC bv and can be obtained regularly by subscription. Please find below the subscription rates:

	Europe	All other countries
1 year Individual	€ 61.00	US\$ 84.00
1 year Library	€ 78.00	US\$ 99.00

Should you wish to take out a subscription then please contact our Circulation Manager (jeroen.zaagemans@gitc.nl).
