

World leaders in marine solutions

Uncompromising commitment to research and development means that VT TSS continually strives to ensure its products remain world-leaders in the marine and offshore markets.

The product range currently includes dynamic motion compensators; heading and attitude reference systems; subsea pipe and cable detection systems;

marine gyrocompasses and voyage data recorders.

The company is also committed to providing excellent customer service and has representatives world-wide for its products and services. You can keep up to date with latest company and product changes on our website at vtss.com or contact us at the following address.

dKart Office

Professional software designed specially for production of Electronic Navigational Charts (ENC/EC), traditional Paper Charts and Notice to Mariners.

The dKart Office system is based on a family of software tools for management, production, maintenance & update of all cartographic data as it becomes available. dKart tools are designed to meet IHO's S-57 standards and can be interfaced to existing chart production lines.

dKart tools can also operate as fully functional stand-alone modules.

Visit www.hydroservice.no for further information and/or evaluation software.
