

GET IT RIGHT FROM THE START

**iXSea brings you HYDRINS, the system which boosts your survey**

*HYDRINS provides high accuracy data in real-time\* which allows for a non-stop survey with no need for post processing.*

*In geographic areas where the survey may be problematic due to interferences from ports, harbours, coastal zones, river bridges or offshore constructions, the GPS reception may be ragged but with HYDRINS, position and height artefacts are prevented.*

*To discover more about how HYDRINS can save you time by getting your survey right from the start, without the need for post processing, contact [info@iXSea.com](mailto:info@iXSea.com)*

*\* 2 cm/0.02°/0.01°/0.01° - meets IHO requirements*
