

**THE
INTERNATIONAL HYDROGRAPHIC REVIEW**

FOREWORD

The *International Hydrographic Review* is published twice a year (January and July) in separate English and French editions.

Original articles are welcomed on hydrography, oceanography, cartography, photogrammetry, geodesy, navigation and allied subjects, radio aids, automation, new instruments, equipment and hydrographic vessels, as well as on the history and organization of hydrographic offices.

The latest date for receipt of manuscripts is :

— 1 August for the January issue,

— 1 February for the July issue,

but earlier submission greatly facilitates the work of preparing translations.

Articles should be addressed to : The Directing Committee, International Hydrographic Bureau, B.P. 345, MC MONACO (Principality of Monaco).

Up to 50 reprints per article can be supplied free to the author(s). They must be ordered prior to publication, and may be in either language or a proportion in each. Further copies ordered are charged at cost price, plus postage.

The Directing Committee does not hold itself responsible for statements or opinions expressed by contributors to the Review.

Notes for contributors

Papers should be as concise as possible for maximum reader value, and an abstract of up to 150 words is desirable. Uncommon expressions or constructions should be avoided since a large proportion of readers are necessarily reading the Review in a language that is not their mother tongue.

Any permission needed to incorporate material published elsewhere is the responsibility of authors, and it will be assumed that such permission has been obtained.

Texts should be submitted in English or French (or both), though by special arrangement articles in Spanish, Italian or German could be accepted for translation in the Bureau.

Two copies of the article are required, typed in double spacing with adequate margins and on one side of the paper only. Authors should check manuscripts very carefully as no responsibility can be taken for errors of fact or presentation.

Bibliographic references should be listed at the end of the article in the standard Harvard form. Footnotes should be kept to a minimum, and metric measures used throughout.

Illustrations, already numbered and titled, should be supplied ready for reproduction by the offset method and for reduction to 12.5 × 21 cm, the effective size of a Review page. Positive or negative transparencies (repromats) are preferred. Photographs should be black and white glossy prints and be limited to those necessary for an understanding of the text.

As the Review is a two-language publication a minimum of wording should be shown on the illustrations themselves, explanations being confined to the legend beneath.

Printer's proofs are corrected in the Bureau and are not normally sent to authors.

DIRECTING COMMITTEE

President : Rear Admiral G. S. RITCHIE, C. B., D. S. C., F. R. I. C. S., Royal
British Navy (Ret.).

Directors : Rear Admiral D. C. KAPOOR, AVSM, Indian Navy (Ret.).
Captain J. E. AYRES, U. S. Navy (Ret.).

Price 65.000 French Francs. For conditions of sale see *List of Publications 1981*.

TABLE OF CONTENTS

- Hydrographic surveys to aid exploration and exploitation in the Exclusive Economic Zone (D.C. KAPOOR)	7
- 9-metre survey motor boats of the Hydrographic Service of the Royal Navy (R.L. BASHFORTH)	13
- A review of the bathymetric swath survey system (E.K. McCAFFREY)	19
- Selection criteria for shipboard automated systems (C.G. WEEKS)	29
- The use of microprocessors for track control and data verification on hydrographic surveys in Canada (G. MACDONALD)	39
- U.K. Hydrographic Department progress with computer assisted cartographic techniques (G.E. MURT, R.G.H. BROWN)	55
- A critical review of automated hydrography within the Canadian Hydrographic Service (R. L. K. TRIPE)	67
- Correlation of surface and underwater position fixing techniques (P. H. MILNE)	77
- Underwater acoustic positioning systems : State of the art and applications in deep water (B. S. McCARTNEY)	91
- Position fixing requirements of the oil industry (A. HAUGH)	115
- The Star/Planet Detector (C. MOLARONI)	123
- Observations on a Seamap (Ph. M. COHEN)	127
- Admiralty method of tidal prediction (Form NP 159) : Refinements and increase in accuracy (A. G. MERRIMAN)	135
- Fifty years ago	143
