

**ANNALES DE L'INSTITUT DE PHYSIQUE DU GLOBE**  
**de l'Université de Paris**  
**et du Bureau Central de Magnétisme Terrestre.**

(24 × 30 cm.: 190 pp. *Les Presses Universitaires de France*, Paris, 1937).

---

Volume XV of the *Annales de l'Institut de Physique du Globe*, published by direction of Mr. Ch. MAURAIN, has been issued.

In addition to the magnetic observations made during 1935 at the various observatories of France and her colonies, this volume contains an article by Mr. J.P. ROTHE which is a valuable contribution to the study of the anomalies of the terrestrial magnetic field. In particular, the first chapter gives a simplified theory concerning the *Schmidt-Askania* vertical variometer, and the method of using it on the field.
