

Echelle des latitudes fictives et des distances

Scale of fictitious latitudes and distances

Projection inverse de Mercator

Inverse Mercator projection

CHART OF THE POLAR ARCTIC REGION ON MERCATOR'S INVERTED PROJECTION

(See plate facing text)

The Chart of the Polar Arctic Region reproduced on plate facing the text is intended to illustrate the second part of the article entitled : "Notes & Tables of Polar Cartography" published in the preceding number of the *Hydrographic Review* (Volume VI, N^o 1, May 1929).

We should have liked to have drawn on this chart the lines of equal fictitious declination, which we consider essential for navigation based on the use on the magnetic compass.

We, however, fear that the magnetic documents in our possession are too incomplete to allow of a sufficiently accurate solution.

L. T.
